

Adobe® PageMaker® 7.0

Using the Save for Service Provider plug-in, you can copy your publication, all linked image files, fonts, and other files required to print your document. The plug-in also helps you resolve broken links by prompting you to locate the folders containing linked files.

You can also create a concise report of the information Action Print needs to output from your PageMaker file. The report includes details about fonts, linked graphics, and a summary of your print settings, as well as information about who to contact regarding your publication.

To save files and generate a report using Save for Service Provider:

1. Choose Utilities > Plug-ins > Save for Service Provider.
2. Click Preflight Pub to check the current publication.
3. Click a tab to see a detailed report on each aspect of the publication. You can print the status information of an area by clicking Print (Windows) or Print List (Mac) at any time.
4. If the Links dialog box shows one or more linked files needing attention, click Relink or Relink All, and navigate to the correct image files.
5. To save the publication, click Package, and set options as follows:
 - From the Report Type pop-up menu, choose Formatted.
 - Select Update Links In Source Pub Before Packaging to bring out-of-date links up-to-date in the original publication before making a package.
 - For Include, select Copy Fonts to avoid missing fonts at print time, and then select the kind of fonts--All.
 - Click Notes to enter contact information (such as your name and phone number), any comments on printing the publication, and any preparation changes, and then click OK.
6. Specify a location in which to save all necessary files.
7. Click Save to copy the necessary files to the destination location.

If you have questions or require assistance using the Save for Service Provider plug-in, feel free to contact our Graphics department at 226-1776.

You may also ask questions using e-mail to the address: graphics@action-print.com; type “Save for Service Provider” in the subject line of your message.
